THE BEST GAME EVER!!! and yea lol i found this game cause its to do with a crow ffs. Its super fun and todally my game if u know what i mean ( read edgy S\*\*t about Suncrow in my profile if u wanna know ). The crow kills and protects things from evil, thats Suncrows job too! they should call it like SUNCROW THE GAME xD but no one but my family and friends know about suncrow.

. Total scam, avoid! They took some old crappy bakery simulator and re-decorated it. Even left "bread" and "bakery" in some places, were lazy to translate it properly, I guess. Interface is bad and confusing, engine is very outdated. They marked it as "adult" game with "sexual content" and put a high price. There is nothing of it there.. Meet your death straight on.

Slay as many foes as you can.

Who will be left standing.. It's pretty good.. Really creative Point and Click adventure sequel to my favourite title from Pendulo (Yesterday.)

Puzzles were hard and I didn't want the story to end.

. Clever but in the end, boring.. The most boring game ever.You have lots of different quests for the same monsters. Kill 20\take 20egs\take 20brains\find 1 note for the same monster.

World is tiny so exploring the map is boring also.Potions requires real money(don't know if you need them but still).Some locked content for f2p user and that's it.

I love walking simulators like The Beginner's Guide and the visual design of Monument Valley, but this game has nothing to it. There's essentially zero gameplay, and the poetry that takes the place of dialogue is too abstract to really connect with. Too short to be meaningful, too repetitive to be engaging.. One of my favourite shooting games for the VIVE. Videos don't do it justice. Well executed and well optimized. Tip - Shoot the logo on the billboard to teleport to a dark road area! Hardcore Night mode really gets you on edge! Once you unlock the rifles you can really start mowing them down at a rate of knots!!. Psychedelic visuals and cool soundtrack; fun gameplay with decent replayability; developer is very responsive to feedback; great value.

Edit: there have been several major content updates since my original review, and the value of this game is now beyond bonkers.. While interesting and lightly educational. This time/resource management game is completable within about an hour. For the current \$5 price that's just past my value marker. It does have replayability but the game is restricted to four levels. At this level of investment I would assume a minimum of 12 plants to play around with.

Overall the gameplay is solid for the limited levels available but it just seems too short and an expansion would make this a must buy.. It's better than the original, sure. But I can't really recommend it.

Pros:

Beautiful art style

Big world to explore.

Much longer than the first game.

Works great with an Xbox controller

It's actually kind of fun :).

Cons:

Performance issues

Long loading times

Tons of glitches (I once flew into the sky lol)

Crashes

Weird controls

Bad camera (and you can't even invert it!)

When you first start playing, you have no idea what to do or where to go (but it's open world, I know).

Level design is meh. The world feels pretty boring and uninspired.

Neutral:

Music and sound design is... ok, I guess? A little boring and repetitive at times.

If you really want it, buy it on sale (like I did).. I never knew killing Llama's could be so fun. Better drop out of school so that I can become a pro.. As someone who plays point&click games for its story, I quite enjoyed this game. The puzzles are adequately challenging for fans of point&click genre. I felt the art and the sound are used to create a convincing Victorian atmosphere.

And the length is also fine for its price. I have been waiting a while for act two. I hope the developer gets around to it.. Tori is an extremely relaxing and calming experience. I would recommend for anyone. It is rather short (about 30 minutes), but it is worth it. A great stress/anxiety relieving game, and actually really fun interactive and atmospheric story-telling. Feels very similar to Proteus, if that's your jam.. Not half bad.
